**Programming languages** - Java, C#, Python.  
**Databases** - Mongo DB, Microsoft SQL Server, Oracle database.  
**Version Control** - GitHub

# PRABHJOT SINGH

## EDUCATION

**Lambton College [Canada]**  
2019 – 2021

It is two-year programming course focused on web development. Mainly, I learned three programming languages – Java, Python and C#. But the area which most attracted me was web development starting from HTML, CSS, and JS to MERN stack. Also, I learned to develop web applications with C# and .NET Framework.

**Swami Chhagan Lal Lala Hans Raj Jain Public School [India]**  
2013 – 2019

This was the place where I learned self-discipline, leadership, time management and communication skills and a lot more. I passed out my high school with 90.2%.

## PROJECTS

I am a fresher, so I do not have a real-world experience, but you can see my skills in my projects.

FaceChat -  
It is a social media platform created with Express backend and MongoDB database.  
Live: <https://facechatapp.herokuapp.com/>

MusicPlay -  
This is a music player with Deezer API. You can play any song you want.  
live: <https://prabhjot2002.github.io/musicplay/>

weather app –  
check the weather conditions in your area with this app. it is using the Accuweather API.  
Live: <https://prabhjot2002.github.io/weatherApp/>

...AND MANY MORE
